

Turnpike Creek Farms

28TH ANNUAL

Production Sale

MARCH 28, 2026 | 12:30 PM EST.
MILAN, GEORGIA †

Welcome

Our Story

It all began in 1891 when David James Williams married Jeanette Bain Cravey and built their homestead. Today, our sale site stands across from the original farmhouse, where Derek and his family now reside.

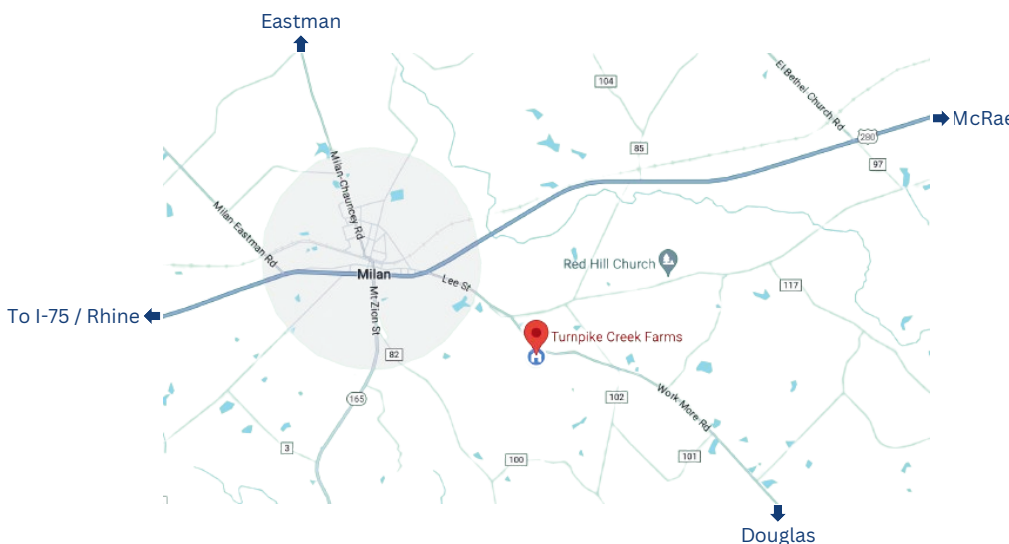

Over the years, our grandfather, Dave M. Williams, and our father, David T. Williams, expanded the land, building upon the strong foundation laid before them. In 1980, our father introduced Angus cattle to our farm, purchasing the entire heifer crop from Mr. Madison Jones of Reedy Creek Angus in Surrency, GA. In 1989, we incorporated Black Simmental genetics, which allowed us to market cattle through State Association sales and test stations. By 1999, we held our first production sale at our farm, a tradition we proudly continue to this day.

Looking to the future, we are excited to continue growing our farm through the Angus industry and other agricultural opportunities. Our sixth-generation family members—Drew (Sarah), Daniel (Holly), Hannah, Davis, and Sarah Grace—are actively involved in farm operations, carrying on our family's legacy. We are also thrilled to announce the arrival of our first precious granddaughter, Alice Ann (Daniel & Holly) in March, joining her cousins, Dutton and Decker (Drew & Sarah) as our seventh generation.

From the auctioneer's block

In early Fall, Patsie and I had the opportunity to visit Doug and Derek and to go through the Turnpike cow herd. We saw an impressive set of brood cows that know how to work and travel in our region of the country. These girls were big enough with lots of capacity and volume; easy fleshing and good uddered; and they possess the style, eye appeal, and calm dispositions that registered and commercial producers breed for. It's obvious why the bulls produced at Turnpike have such maternal power.

Carroll T. Cannon
Auctioneer, Cannon Marketing Company

Turnpike Creek Farms is located 1 mile east of Milan and US 280 and 8 miles west of GA 441 and US 319 on the Workmore-Milan Road. The farm is located 45 miles east of I-75 and 45 miles west of I-16

28TH ANNUAL Production Sale

Welcome Valued Friends and Customers,

The auction will begin at 12:30 p.m. and lunch will be provided. Included in this sale book is a basic set of EPDs and calculations. A more comprehensive view can be obtained from the American Angus Association website, www.angus.org by using the animal search with the registration numbers in this catalog. Videos of the cattle will be available before the sale through LiveAuctions.tv

Please feel free to call for more information and or visit Turnpike Creek Farms on Facebook or online at turnpikecreek.com for additional information. We look forward to seeing you on sale day, March 28, 2026.

LIABILITY

All persons who attend this sale do so at their own risk. Owners and Sale Staff assume no liability for loss or accidents that may occur.

DELIVERY

Free delivery offered within a 250-mile radius.

SALE TERMS

Sale cattle will not come through a sale ring. They can be viewed in pens at the sale facility. A prerecorded video of each lot of cattle will play as the cattle are being auctioned. Cattle will sell under the terms and conditions of the American Angus Association.

All announcements made on the sale day will have precedence over any comments and information printed in the sale book.

BREEDING INFORMATION

A supplemental sheet will be available on sale day to provide up-to-date breeding information on all cattle for sale.

FIRST YEAR BREEDING GUARANTEE

Bulls are guaranteed to be sound and healthy breeders, with a first breeding season unconditional guarantee. Breeding season is defined as the first 90-days following first turn out. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should an injury occur and prior to the injured bull being sold for salvage. For more coverage on any lots, we suggest using James F. Bessler LLC Livestock Mortality Insurance at 817-562-8980.

ONLINE BIDDING

Join us online at www.liveauctions.tv for live bidding. Must register online to bid. For more information call 817-725-8595.

Fall Angus Bulls

This bull offering may be the most consistent, three-dimensional group to date. These bulls have been cared for, but not pampered. They are hand fed daily a custom grain ration and good hybrid bermuda/bahia grass hay. Testosterone and fat are inversely correlated. We feel like the heifer counterparts are a more true indication of carcass merit. High libido, high testosterone bulls at this age should be blowing, snorting, and pawing the ground; acting like a bull. We feel these bulls exemplify this.

Dr. John Mabry (former UGA genetics professor) taught that single trait selection can be rapidly achieved by turning generations, but multiple trait selections take time and years to accomplish. Define your goals and selections accordingly. This set of bulls represent 46 years of selecting low birth, growthy, maternal cattle with longevity.

You, our valued customers, are good cowboys and cowgirls. We hope you like what you see and know with confidence that the bulls here are backed by time tested, proven genetics.

Females

Heifers

The heifers offered are the results of 45 years of selecting highly maternal, easy fleshing, growthy cattle. Their pedigrees are stacked full of cows adapted to perform on southeastern grasses. We feel confident that they will be productive for years in your herds.

Expected Progeny Difference

EPDs are the prediction of how progeny from each animal is expected to perform relative to the progeny of other animals in the Angus breed. As data continues to accumulate, accuracy levels rise and EPDs will shift accordingly.

CALVING EASE DIRECT (CED)

Is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

BIRTH WEIGHT EPD (BW)

Expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

WEANING WEIGHT EPD (WW)

Expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

YEARLING WEIGHT EPD (YW)

Expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

MATERNAL MILK EPD (MILK)

Is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

SCROTAL CIRCUMFERENCE (SC)

The larger the measurement is a good indication of semen volume one can expect from each bull.

MARBLING EPD (MARB)

Expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

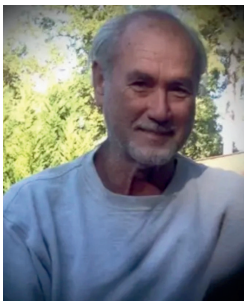

RIBEYE AREA EPD (RE)

Expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

28TH ANNUAL *Production Sale*

*and to those who helped
us along the way...*

Derek and I both completed Animal Science degrees at the University of Georgia. We were fortunate to have studied under some of the best professors and instructors in the country during this time. Their influence instilled principles that we continue to employ daily. We want to thank them for their contributions to our agricultural education and the industry.

-Doug and Derek Williams
